DETAILED ACTION

Claim Rejections - 35 USC § 102 ...

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Tamura et al US Patent 6020824.

Regarding claim 6, Tamura et al discloses an assembly comprising:

a housing(element 10, Figs 1-35) for receiving a plurality of plug-in cards(element 50, Figs 1-35), a display unit(element 40, Figs 1-35); to which said plurality of plug in cards are connected, said display unit comprising a frame(element 30, Figs 1-35) with a display, a keypad(Fig 4) and a circuit board(element 20, Figs 1-35), for forming a switchboard installable device, wherein conductive traces of said circuit board serve for the electric connection of said plurality of plug-in cards and an adaptation module(element 30, Figs 1-35) connected to said housing which serves for securement to the hat rail and which has a circuit board(element 20, Figs 1-35), whose conductive traces are laid-out correspondingly to the conductive traces of said circuit board of said display unit.

Regarding claim 7, Tamura et al discloses wherein on said circuit boards, card edge connectors(element 60, Figs 1-35) are provided, which are situated to be mutually fitted

Art Unit: 2841

such that, on placement of either said adaptation module or said display unit onto said housing, the connections between said plurality of plug-in cards are produced.

Regarding claim 8, Tamura et al discloses wherein said circuit board has display operating electronics for said display(element 20, Figs 1-35).

Regarding claim 9, Tamura et al discloses wherein said adaptation module has two angle sheets(see ends of element 30, Figs 1-35), of which at least one is resiliently mounted to serve for a snap-in connection with the hat rail.

Regarding claim 10, Tamura et al discloses wherein said adaptation module comprises steel sheet(element 30, Figs 1-35).

Regarding claim 11, Tamura et al discloses wherein said plurality of plug-in cards include at least one of: a CPU-card, an 1/0 card, and power supply card (element 50, Figs 1-35).

Response to Arguments

Applicant's arguments filed 10/19/2006 have been fully considered but they are not persuasive. In response to Applicant's argument that it is the adaptation module which serves for attachment to the rail, the Office contends that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In the instant case, the prior art adaptation module is deemed as being capable of attachment to a rail.

Application/Control Number: 10/537,342

Art Unit: 2841

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dameon E. Levi whose telephone number is (571) 272-2105. The examiner can normally be reached on Mon.-Fri. (9:00 - 5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamand Cuneo can be reached on (571) 272-1957. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
